Blinds with a view

The roller blind is one of our most popular blinds due to its practicality and smooth operation. It's extremely versatile with a wide range of fabrics, colours and textures to pick from. You can match it to suit almost any taste in décor.

They operate on the sophisticated Acmeda mechanism and you have the option to have them on a standard bracket, a dual bracket system, linked roller blind system, motorized, theatre cassette or our Rolution one touch system.

Blockout – Great for bedrooms and theatre rooms.

Sheer – Is perfect for filtering in the natural sun light.

Sunscreen – They offer the option of retaining your view of outside while during the day no one will be able to see inside your home.

Day/Night – This option is fantastic in living/dining areas where you would like to be able to keep your view of your backyard but yet maintain privacy and still protect your home against the sun.

NEW! Wirefree – This new product from Somfy is 100% wireless motorisation.

Rolution (One Touch) – Our new Rolution system is a great way to operate your blinds without the fuss of pulling chains up and down.

Theatre Cassette – It is a blind specifically designed to go into a theatre room (or any room you wish to have completely darkened) and create complete darkness.

Motorisation – Most of our products – internal and external – can be **motorised**.

Sheer Elegance – is a revolutionary new roller blind that allows you to maintain your view while protecting your privacy.

Day/night
