Tilt-safe option

### **25mm Slimline Venetians and 50mm Venetians**

Aluminum Venetians are a very affordable and yet stylish way to furnish your windows. They blend well into any interior décor making them highly versatile. You have a great amount of control over these blinds as you are able to control the amount of sunlight emits each room, also making it a great privacy feature.

Aluminum Venetians are very hard wearing and are made to last even in humid conditions or our harsh Australian sunlight. You may even put them into wet areas such as bathrooms, kitchens and toilets without having to worry about them being negatively influenced by this atmosphere.

They have the ability to help protect your rooms from external temperatures. Without blinds, about 87% of the heat will come through your windows in the summer, and about 50% of the heat will go out through your windows in the winter. Stay comfortable with aluminum venetian blinds.
