## The clutch, the heart

We all know that the body does not function without a sound heart. The clutch is the heart of the roller blind. SunBoss is that heart. It boasts many advanced features that make it different to any roller blind clutch you have ever seen before.

As one of Australia's leading roller blind component wholesalers, we understand the key elements that create a great product. As a result, the SunBoss clutch is truly different. Smoother, quieter and more stable in the brackets, SunBoss raises the bar on performance.

### Key features include:

- ✓ Direct drive clutches for everyday use and geared clutches for larger blinds. The geared clutch utilises our unique HardCore™ metal core technology that surrounds the core of the clutch to make it smoother, quieter and more durable for the long term.
- ✓ New design eliminates the chain guard for smoother and quieter performance and less damage in transit.
- ✓ Inside the direct drive clutch are 4 springs, improving the long term comfort and strength of the clutch.
- ✓ Universal spring assists fit both clutches.
- ✓ Unique Stabiliser Bar keeps the clutch held more firmly in the brackets for smoother operation.
- ✓ Suitable for use with 38mm, 43mm, 50mm and 63mm tubes, using tube adapters.
- ✓ Easy two-stage opening that is quicker and easier to fit chains.
- ✓ System is available in 5 contemporary colours: white, grey, ivory, latte, black.

- World class, fully featured systems designed in Australia, Made in USA
- Stainless steel chains • Choice of colours bottom bars • Smooth and quiet geared system • Premium aluminium tube • Motorisation available • option of cassette and theatre system • 10 yr warranty

## Fascia

The SunBoss fascia creates a modern finish that will enhance any installation, either residential or commercial. Available in square and rounded profiles, the SunBoss fascia will excite your customers.

To better match the interior décor of your project, our fascia profiles are available in three standard matt colours - white, cream & black, plus clear anodised and mill finish for custom projects. Not surprisingly, we go the extra step to ensure the finish you achieve is exceptional. Our anodised finish is nothing but perfection, bead blasted and then anodised to 20 micron depth to remove all imperfections from the extrusion surface.

## Cassette

With the SunBoss cassette you no longer need to compromise when it comes to blackout blinds – on style, appearance, performance or flexibility! This sleek system offers attractive contemporary looks and total light blocking with a unique wrap around design.
