

## FEATURES & BENEFITS

- Great for smaller windows in the home or office
- Can be mounted onto the wall surrounding the window (face fit) or set inside the window reveal. Either way looks chic, and offers top-rate sun protection
- Side channels (that guide the awning) come in a variety of powder-coated shades, making it easier to colour-match to your building exterior
- Multiple “stopping points” allow for better control of light and glare, while maximizing airflow into your rooms
- Manual operation only
- All components are backed by the Uniline five-year warranty

# Side Channel Awning

Neat, chic and petite, Uniline’s Side Channel Awning was designed with smaller windows in mind. For the home or office, the motto here is minimal. Of course, it’s smart too. Boasting a top-roll system with easy twist-lock operation, the Side Channel Awning has multiple stopping points, allowing you to better control sun and glare, while still keeping your indoors well ventilated. And when it comes to colour-matching your awning to your exterior, there is plenty of scope. Choose a fabric from Uniline’s Uniview Outdoor or Unishade ranges, then co-ordinate the side channels with a variety of optional powder coat colours. What could be easier?

# Automatic Awning

Want to shade your windows from direct sunlight, without losing out on fresh air and breezes? Cue the bestselling Automatic Awning from Uniline. Created for ground floor windows, the slanted design sits out slightly from the base of the window, inviting breezes while still maintaining optimum privacy and heat protection.

## FEATURES & BENEFITS

- Perfect performance, year after year, thanks to Uniline’s plastic, imported from the engineering industry, and revered for its outstanding strength and longevity
- Comes with optional stainless steel fittings – ideal in coastal locations
